## Indoor/Outdoor, All-Purpose Laminate Dance Floor

A brand activation for 1,000, an estate wedding, or an outdoor charity gala; no matter the location our laminate-top dance floors are the perfect solution for providing an attractive and stable dance surface anywhere. These high-quality panels are water, scratch, and weather-resistant and are so durable that they can last for years.

The CPDFC Composite Laminate dance floor is available in 3 colors: New England Plank (a rich, wood color), Black and White. The running plank pattern of the New England Plank offers the upscale appearance of wood, but with the practicality and affordability of laminate. The black and white color options offer versatility for a variety of functions and occasions. An all-white dance floor is perfect for weddings. Or, create a black-and-white checkered dance floor for maximum drama!

With the exterior grade, moisture resistant, 3/4" plywood base, and its pressure treated composite laminate top, this is one of the most durable floors available. These sections also have a resin coated backing for extra protection from the elements. Make sure the dancing lasts all night with a CPDFC Composite Laminate dance floor!

## Simple to Use

As with our entire line of CPDFC dance floors, our composite laminate panel uses a unique, tongue-and-groove connection system which is simply aligned and then screwed in place to form a secure, seamless connection between panels. These panels are designed to create an even, stable dance surface over unprepared or uneven ground indoors and out.

## Pole Sections

Our pole sections are the perfect solution for dance floors installed around columns or tent poles. Two pieces put together create one section with an 8" hole. Available in all standard sizes in New England Plank, White, or Black.

*Pole sections also available in vinyl.*
